NOW IS THE TIME TO

Take your choice chrysanthemums which you rooted from cuttings and pot them in preparation for planting in your border later on. This will give you the fall color you need.

Fertilize trees and lawns after rains begin. Use fertilizer low in nitrogen and high in phosphorus and potash. Fertilize camellias, jasmine, croton, plumbago, podocarpus, hibiscus, poinsettia, and azaleas.

Divide daylillies. Tip prune azaleas.

Cut poinsettias back halfway. Plant 12" poinsettia cuttings in 9" holes. Press soil down firmly and water well.

Spray mums with Fermate or Zineb at weekly or ten day intervals for the rest of the summer. (Two tablespoons to the gallon.)

To propagate azaleas and camellias from cuttings, take off young growth that snaps when you break it between your fingers, the bark showing between green and brown. Remove all but two or three leaves and pinch off any new growth. Leave the eyes on the camellia wood, snipping leaves off with cutters. Set in peat or white sand. Spray leaves with water four times a day and keep soil moist.

Prepare beds for planting herbaceous perennials. Enrich soil with manure, tankage, and peat moss.

Plant Annuals for	Bloom	Plant Annuals for	Bloom
Late Cosmos	Oct	Portulaca	August
Cypress Vine	August	Tithonia	Sept
Gaillardia	Sept	Torenia	Sept
Marigolds	August	Zinnia	August
Morning Glory	August	Chrysanthemum	Nov

Plant Bulbs for	Bloom
Iris (Native)	March-May

SHOW DATES

At this time the shows are scheduled for the dates listed. Jacksonville will not have a show this year, Ft. Myers has not picked a date yet nor have we heard from Orlando.

Norman Reasoner, Bradenton-Sarasota	August 30th
Putnam County	September 20th
Golden Triangle	September 27th
Ridge	October 4th
Indian River	October 11th
Halifax	October 18th
Sunset	November 1st

Make your plans to be on hand with the best bloom you have and take home the trophies.
